

Future proof your career as an industry leading interdisciplinary practitioner

Our Interdisciplinary Practice Graduate Program gives you the skills, supervision and experience to excel in a community-based disability practice on a career path that fits you.

Learn how to deliver industry leading therapy that results in exceptionally positive participant outcomes, and

stand out as a future-ready practitioner with the skills it takes to drive positive change.

You'll expand on the strong foundation of your allied health degree and learn new skills:

- ≡ Social model principles, tools and metrics
- ≡ Interdisciplinary planning and teamwork
- ≡ Working effectively in the community
- ≡ Family and community engagement skills
- ≡ Enhanced discipline-specific skills for community-based practice.

- ≡ Medical model principles
- ≡ Discipline-specific best practices
- ≡ Professionally ethical behaviours.

- ≡ Social-ecological model principles
- ≡ Interdisciplinary team best practices
- ≡ Commercially successful behaviours.

HOW YOU'LL LEARN

During the 12-month program, you'll learn from communities, individuals, teams, and online groups. With a curriculum that includes two learning streams, you'll build your interdisciplinary practice while honing your discipline-specific skills for working in a social-ecological model as part of an interdisciplinary team.
